Now all of Jessica's friends are prisoners in the realm of phantoms. To rescue them, travel to Africa and enlist the help of a kind sorcerer and old ancestral spirits. Where this game is at right now, you can find yourself just wandering the land randomly just looking for loot. I don't really see a point rather than playing this and messing around in it to waste time. Rather when it gets updated and the developer/s stay on top of it i have a good feeling about this game and may be fairly fun and unique, plus its \$1.99 so like why not lol, i was gonna get a refund but then i was like "It's only \$1.99 so it can't really hurt to keep it" and that's where making this review came from ;w; But i think this game has a lot of potential and keep up the work developer/s :). Lume is a cute little fun game to play. I felt it was like the demo for Lumino's City since it was so short, although I think that was actually this cute little game that sources to Lumino's and I'm glad for that cuz that's one of my favorite games of all time.

I don't recommend this game for its started price tho (sorry but its too short for 6\$). If you're a fan of Lumino's City you must play this one, if you're not but you enjoy click and point V puzzle games go for it anyway, on sale is totally worth it!. After playing Hidden Folks I was in the mood for more hidden object games in that vein, and Under Leaves mostly delivers in that aspect albeit in a much simpler way. The game is relaxing and lovely, with a charming picturebook art style and ambient soundtrack. However, don't go in to this game looking for a challenge--while it does get a little trickier in the later levels, it will not take long to go through the game, and what you see is what you get as there are no interactive areas or puzzles to solve. Sometimes, however, short and simple is all you want!. Great little game!. Second fav VN, Ignore my playtime I just skipped it all on this steam version since I have the mangagamer one.

Characters are pretty cool, and though I found some parts of the plot unrealistic, it's not so bad that I can't suspend my disbelief.

Chiho is mine. Not yours.

The length of the game is very solid, a lot of VN's on steam you can finish in a couple hours, but even on skip mode it took half an hour as you can see. I do feel like some parts went on for too long, but this is a minor complaint since I was entertained with the characters regardless.

Though the choices take quite some time in-between each one, all except one felt meaningful.. I may be wrong but I find the Gold skin too overrated. I bought this for Tiger and Zebra skins. They look sick.. Incredible game! For only \$5 this game is definitely worth it.. Amazing game. Highly recommend it. Just hoped that more people played it.. I wouldn't say this game is a bad game. It has good graphics and it's a pretty good puzzle game. But this game isn't something I would see myself playing when I'm bored, nor do I see myself enjoying it for hours on end. This game is honestly not worth \$3. I've found this game online for you to play for free, so why purchase it on steam? If you want to play it then play it online. I think if steam were to have this game they should make it free or about a dollar, not \$3.

Well that's just my opinion. But I strongly suggest playing this game online and not wasting the money and buying it.

armored fist more like fist my armored ♥♥♥♥♥♥♥♥♥♥. Just shortly into the game so far and it seems like an early access game alright, unless I need to come back to edit this review later it has a ways to go. However, imagine Space Engineers, with the design style of Subnautica, super sleek interfaces, and a level of immersion that'll throw you off - literally - when you careen into orbital debris without anything actually touching your real body. I'll definitely be getting further into this game, and I expect I'll be sinking a lot of time into it.. Pretty good story. Haven't really finished a game from start to end in a while but this one kept me going.

Story is good, loved all the details and extra side-things I was able to find.

There's a couple bugs that either prevent you from finding a correct solution (had to use a Steam Guide for one of them due to a bug, and sometimes the windows flicker like crazy, sometimes the input hangs, etc). But aside from these issues, it was a fun story to play through. Would recommend!. This game has been a fun and challenging ride so far! The controls/motions could be smoother, like when getting up stairs, but that just comes with the territory of playing a new indie game. The music in the game is also really cool. I look forward to making it through all the levels. I just posted my first episode of gameplay if devs/gamers are interested in seeing it in action.

[This is definitely worth \\$1 to play. But.... Keep your head on a swivel.....cause those barrels are coming!!!!. Crashes ALL THE TIME!! I bought a few asset packs and every time I open one it crashes. Garbage.. Great little time waster. Fun to play a few rounds and then put down.. Awesome. Love puzzling. =\)](#)
